tips

Describe your project using this form. You can always make changes later.

In the title, mention the key technologies the project involves.

Keep the project descriptions concise.

Use attachments to add detailed schematics and requirements.

If you are unsure of the contract amount, specify a reasonable sum, and negotiate the value in a private discussion room.

Project Details

**Title:** Load Balancing Switch or Router for Scaleable WebSite

**Summary:** Need ultra reliable solution with low overhead code on linux platform that checks webfarm machines running ASP using Session objects to route browser traffic to webserver with lowest load. The solution should also work with AOL traffic.

**Keywords:** IS, load balancing switch, NT, router, Windows

**Categories:** Networking > Routers  
Networking > Switches  
Networking > Administration

**Project Type:** Proposal

**Estimated Contract Value:** US\$4,000

**Submitted Date:** Wednesday, December 15, 1999

**Expiration Date:** 2/13/2000 mm/dd/yyyy

**Status:** Proposals Received

**Billing Contact:** joe@hellobrain.com

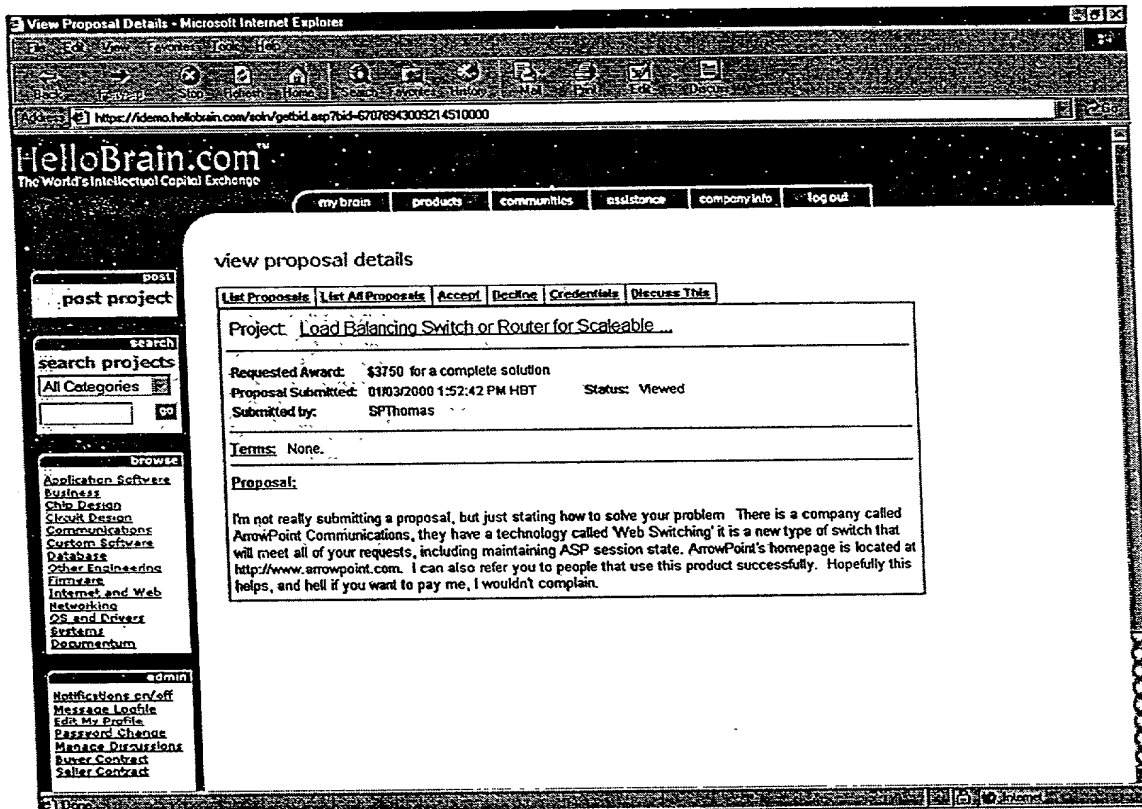

**Technical Contact:** joe@hellobrain.com

**Proposals Received:** 1  
**Proposals Accepted:** 0

**Page Hits:** 184

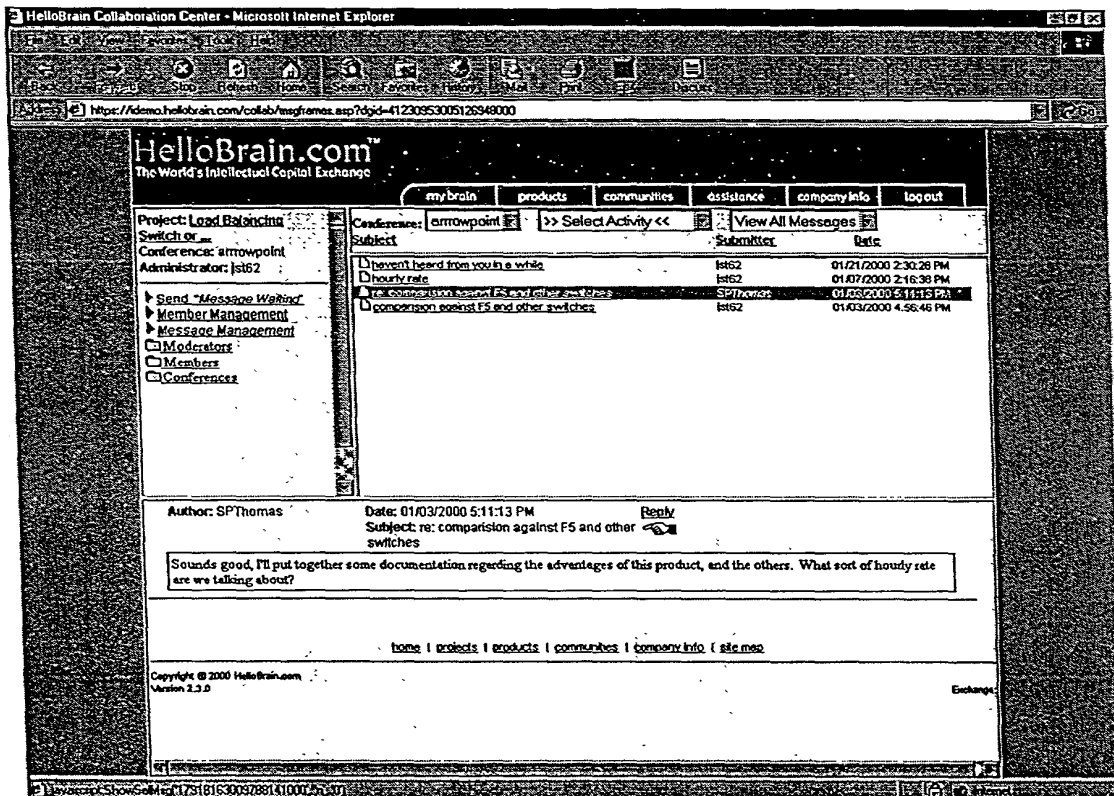

**Project Description:**  
ASP sessions need to be maintained. The switch will find new web servers that are installed dynamically and circumvent servers that are down or not responding. It will maintain sessions going to the same server or you should explain how a webserver would redirect the request to the appropriate server. The best proposal will include suggestions on saving shelf space and maximizing throughput.
